STAND UP

A present health care crisis threatens vulnerable patients who suffer, in silence, alone, without a friend, or partner to care for them when discharged from an emergency or hospital room. They are not receiving care they need, and return to hospitals that are overcapacity, placing them at possible risk for sepsis.

With your support, the Home Care Initiative will provide them with the services and supportive comfort they need with vital early medical detection, intervention, patient safety, and emotional support. Additionally, VCMRF provides free dental and vision services for low-income children & seniors, who are at risk for complex health care diseases and rely on us to get them access to care that they need.

Get ready to raise your bid card at the event to support VCMRF & its programs
(cash, checks & credit cards will be accepted).
